THE SUMMARY REPORT

Students learned about ecosystem and healthy rivers. They discussed about the landscape and environment

They chose to study about a river that flows through their town: Elsa

They planned the survey studying about water analysis and natural and historical information

During the survey they took note and picture and did some experiments (water analysis , speed , direction)

After, at school they worked in group , elaborated and shared their reports and observations.

about the construction of LBGame, they worked in group

Each group wrote a storyboard, they discussed and chose to write a story collecting ideas from each group story

Each group developed a question and related answer and supplementary worksheet

The students reached the target the teacher promised

- working in team
- learning about the the area where they live
- developing a critical rethinking
- developing a environmental approach
